Stormwater and Land Disturbance Application for sites less than one acre of land disturbance

Site Plan Sheet Requirements

The Stormwater Management and Sediment Control Plan required for land disturbing activities less than one (1) acre which are not part of a larger common plan of development or sale shall contain the following information, as applicable:

1. An anticipated starting and completion date of the various stages of land disturbing activities and the expected date the final stabilization will be completed;
2. A narrative description of the Stormwater Management and Sediment Control Plan to be used during land disturbing activities;
3. General description of topographic and soil conditions of the tract;
4. A general description of adjacent property and a description of existing structures, buildings, and other fixed improvements located on surrounding properties;
5. A sketch plan (engineers, Tier B surveyors, or landscape architect's seal not required) to accompany the narrative which shall contain:

A site location drawing of the proposed project, indicating the location of the proposed project in relation to roadways, jurisdictional boundaries, streams and rivers;

The boundary lines of the site on which the work is to be performed;

A topographic map of the site if required by the County;

The location of temporary and permanent vegetative and structural stormwater management and sediment control measures; and

Riparian buffers and setbacks requirements to protect receiving water bodies shall be maintained as required by the Florence County Zoning Ordinance.

6. Stormwater Management and Sediment Control Plans shall contain certification by the person responsible for the land disturbing activity that the land disturbing activity will be accomplished pursuant to the plan.
7. All Stormwater Management and Sediment Control Plans shall contain certification by the person responsible for the land disturbing activity of the right of the County or DHEC to conduct on-site inspections.

The requirements contained above may be indicated on one plan sheet. More detailed hydrologic or soils information may be required on a case by case basis by the implementing agency. Storm water detention/retention may be required if excessive water problems are known to exist in the area.
